

## MMPEI Faculty Fellow Program

MMPEI will establish a Faculty Fellows program to engage faculty who are active in energy research and education on campus. Faculty Fellows will gain a broader view of the energy activities and opportunities within MMPEI, and will be in a position to help shape the energy initiative, while serving as a resource for MMPEI and the energy initiative. Faculty Fellows will not be asked to attend formal meetings as a group, rather, their participation will be opportunity-driven. Faculty Fellow membership will be reviewed annually to ensure that both the Fellow and MMPEI have continued interest in continuing the appointment, that the Fellow is still engaged in energy research or education and that they have assumed an active role within MMPEI.

### **Benefits to MMPEI Faculty Fellows:**

- Fellows are listed on the MMPEI website (along with a brief biography and a link to their web page) as experts in their energy fields, and will be given the first opportunity to provide their expertise to requests from outside the university
- Fellows may list their affiliation on their CV and research proposals
- Fellows are provided with the opportunity to advise or to team on externally funded research initiatives
- Fellows have the opportunity to network with both Faculty and Corporate Fellows
- Fellows will be given the opportunity to help shape the energy initiative at the University of Michigan and guide MMPEI

### **Expectations of MMPEI Faculty Fellows:**

- Fellows are active in energy research and education
- Fellows will participate in MMPEI activities and events and may serve on ad hoc committees, calendars permitting
- Fellows are expected to be responsive to inquiries from the media, industry and government offices
- Fellows are available to provide advice or feedback on opportunities or solicitations brought to MMPEI
- Fellows are willing to review proposals for energy research and education programs
- Fellows are willing to promote energy research and education at UM through MMPEI

Faculty eligible for MMPEI Faculty Fellows status are all tenure and tenure-track faculty, research professors, research scientists and clinical instructional faculty and lecturers engaged in energy research and/or education. Appointments of MMPEI Faculty Fellows will be made by the MMPEI Executive Committee at their regular committee meetings. Applications will consist of a request for consideration along with a short bio and a statement of current activity in energy research and/or education.

All applications should be sent to Shelly Sherman at [sacs@umich.edu](mailto:sacs@umich.edu).
